

Outsourcing has proven to be valuable to many businesses.

Outsourcing payroll, time and attendance, benefit administration, and human resource management helps organizations become more effective by freeing internal resources while at the same time gaining access to expert support and achieving cost savings through advantages such as:

- ✓ **Streamlined Services and Integrated Systems**
- ✓ **Organizational Efficiencies**
- ✓ **Risk Reduction and Compliance**
- ✓ **Lower Aggregate Costs**

Streamlined Services and Integrated Systems: Our professional services pull together all aspects of your human resources and payroll administration – and puts them at your “fingertips”. Imagine the efficiencies that can result when information flows automatically through inter-related functions. The Human Resource Consulting Group, LLC maintains integrated computer systems to track employee records, performance reviews, skills, strengths, certifications, licenses, attendance records, bonuses, and the like. We are your one primary resource for centralized management of employment benefits and personnel data.

Organizational Efficiencies: Are you managing employee records, time-off requests, bonus data, and your human resource functions through spreadsheets? Managers can more easily make strategic decisions based on data when outsourced technology gives them the ability to aggregate, view, and report on it easily – instead of struggling to produce a consolidated view of their data because it is locked in many different applications and disparate spreadsheets. Proper management of employee records ensures better control over one of the organizations highest costs; wages and benefits.

Risk Reduction and Compliance: Human resource services are increasingly complex, and rules and regulations constantly change. Outsourcing significantly reduces the risk of legislative non-compliance by providing streamlined, comprehensive support delivered by a team of certified, human resource experts with knowledge of tax and labor laws throughout the United States. We specialize in managing multi-state operations for many organizations.

Lower Aggregate Costs: Outsourcing is a cost-effective alternative to buying, maintaining and modifying technology systems. In addition, your company will use our resources to gain access to specialized expertise and systems resources, resulting in the right information when and where you need it to make effective decisions about your business, respond to employment issues, and streamline employee support.

Call me find out how easy we made it for Al Chance, owner of 51 Jiffy Lube Franchises in multiple states.
