

Carrier Connect

Streamline the benefits enrollment process, saving time and reducing errors

Benefit carrier feeds are crucial to the enrollment process. Designed to reduce the time spent communicating changes and updates, employers can automate the process, minimize compliance issues and relieve HR stress.

isolated Carrier Connect enables you to seamlessly integrate with hundreds of insurance carriers to streamline your benefits enrollment process. Through our paperless system, you can securely transmit your benefits enrollment and demographic data directly to your carriers, avoiding missed enrollments and charges for terminated or ineligible employees. You can automate the flow of data to simplify workflows and save time.

With our intelligently connected platform, you don't have to worry about duplicate data entry from manual changes, reducing errors and potential compliance risks. Carrier Connect takes care of the rest, giving you peace of mind and the support you need.

isolated Carrier Connect streamlines the benefits process, increasing efficiency, accuracy and employee service.

- Automate the communication and benefits enrollment process between isolated and your benefits carriers to save time and costs
- Reduce errors from manual data entry
- Streamline the data exchange process to ensure your people are properly covered
- Increase agility so you can respond quickly to workforce demands
- Send files securely via Secure File Transfer Protocol (SFTP) and data encryption to minimize compliance risks
