

Learn & Grow

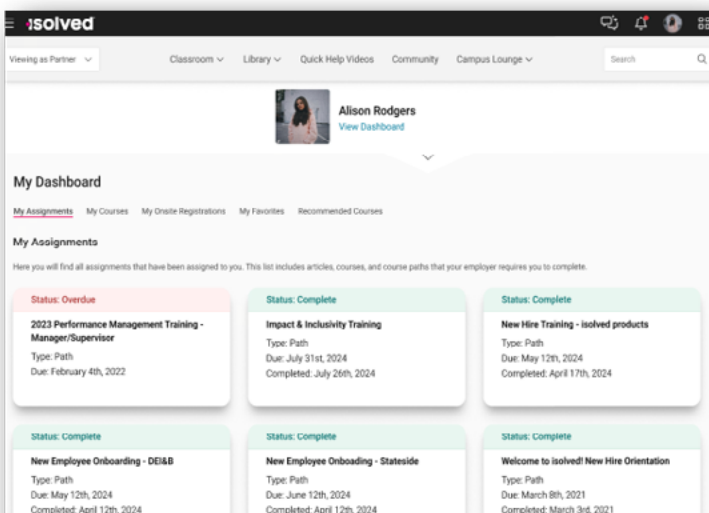

Streamline Employee Learning to Boost Performance and Engagement

Employees expect more from their employers, with learning opportunities at the top of their list. A learning management system (LMS) can help your organization attract, develop and retain top talent, while also upskilling your current employees to do their jobs more effectively and keeping your business compliant.

With isolved Learn & Grow, you can deliver a simple yet powerful training solution that keeps your employees sharp, engaged, and dynamic. Our solution makes training easily accessible to everyone on your team with an intuitive interface. Self-paced courses give employees flexibility and gamification elements keep learners engaged.

isolved Learn & Grow includes:

- Comprehensive dashboards and reporting to view employee learning and development
- Robust Content Library and SCORM compliant courses
- Industry-specific and AI-generated paths help teams ramp up fast with structured learning
- Personalized, configurable curricula for individuals, teams and the entire organization
- Skills Insights with a snapshot of the skills employees are mastering, those that need additional training, and top skills within your industry
- AI-powered search tools and a chatbot to effortlessly access information
- Social learning tools and gamification elements, with badges and certifications
- Training recommendations to broaden employees' learning experience
- An Admin Wizard that easily walks you through the course and path setup

Key Benefits:

Access a robust content library with over 95,000 courses on a range of topics and languages, from industry courses to skills-based and personal development options

Leverage artificial intelligence (AI) and search capabilities within the content library make it easy to filter through, sort and curate playlists that promote talent development and drive retention

Prepare for the future with AI-powered Skills Insights—assess which industry-specific skills your workforce needs training on to move the business forward

Optimize learning using AI-enabled Playlist Paths to turn curated playlists into structured learning tracks, accelerating access to targeted development resources. Incentivize upskilling through personalized paths, quizzes, and certifications that align with employee and company growth goals

Establish learning teams to encourage communal engagement and assign coursework based on roles, tenure, specialized training and other factors

Utilize dashboards and reporting to easily track employee progress and course completion, so you can monitor growth and remain compliant with regulations and standards

Recognize and reward employees with digital merit badges and certificates that show course progression and completion

Energize your talent, while growing and honing your skills with an immersive learning supported by a vibrant community built for admins managing and shaping the employee experience through People Heroes World

Improve Employee Recruitment and Retention

Enable employees to grow and fine-tune their skills by providing tailored and on-demand learning options, helping you create a talent pipeline for the future, while remaining competitive and preventing turnover. Incentivize upskilling and strategically deliver content to help your team succeed with a robust Content Library that includes built-in Skills Insights, a powerful AI skills taxonomy tool that admins can leverage to classify content with relevant skills and match them to desired learning needs. You can also leverage curated playlists and AI-powered searchability with a chatbot to help you quickly find exactly what you're looking for.

Provide Enhanced Learning Experiences and Remain Compliant

Effortlessly create configurable paths, quizzes, and certifications, and assign courses based on roles and business needs. AI-enabled Playlist Paths turn curated content into structured learning tracks to accelerate access to essential training and enhance the overall learning experience. With powerful reporting tools to keep content relevant, isolated Learn & Grow helps reduce compliance risks and drive measurable results.

Boost Engagement and Productivity

Encourage employees to grow personally and professionally with learning opportunities that reward and recognize learners with digital badges, certificates and points for completing tasks. Align organizational goals with your employee's performance, identify skill gaps and deliver training to bridge those gaps for individual and company-wide success. And with People Heroes World, HR teams can source advice from like-minded professionals, share experiences and earn rewards in an immersive community to fuel meaningful communication and collaboration.

Contact us today to learn how you can deliver valuable learning opportunities anytime, anywhere with isolated Learn & Grow.
