

See the isolated People Cloud™ Difference

Modular by Nature. Unified by Design.

Fifty-eight percent of human resources (HR) decision-makers are using four or more solutions to meet their human capital management (HCM) needs, with nearly a quarter saying that using too many platforms is the reason why they're considering switching HCM providers this year.¹ This means vendors offering a unified platform will be high on the priority list.

isolated People Cloud is a modular, yet unified HCM platform that spans across HR, payroll, benefits and talent—delivering artificial intelligence (AI)-driven automation and analytics to seamlessly manage the employee journey from pre-hire to retire. It's also backed by expert services, industry-leading support and an engaged peer community.

What Sets isolated Apart

- ✓ Scales to meet evolving needs through modular, yet unified HR solutions
- ✓ Extends HR's impact with integrated software and expert services that work together
- ✓ Simplifies people-first management to give HR more time to be strategic
- ✓ Supports compliance proactively to reduce organizational risk
- ✓ Streamlines talent acquisition to help organizations find skilled employees
- ✓ Strengthens employee experience and engagement to boost retention
- ✓ Delivers superior service and rapid implementation for quicker time-to-value
- ✓ Provides dedicated resources to support professional and business growth, including a peer-community, learning experience platform and events
