

Transform the way you manage employee time with Time & Expense and Attendance!

Time Labor, and Attendance is a powerful, cloud-based solution for keeping track of employee time.

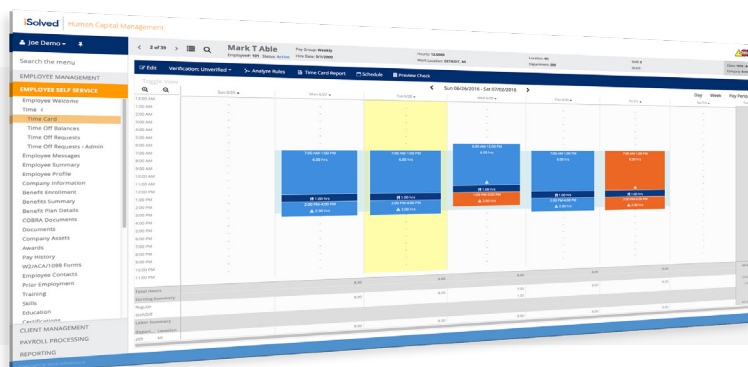

It is simple to use but includes robust and flexible features that adapt to evolving requirements and ensure complete, accurate timecards every time.

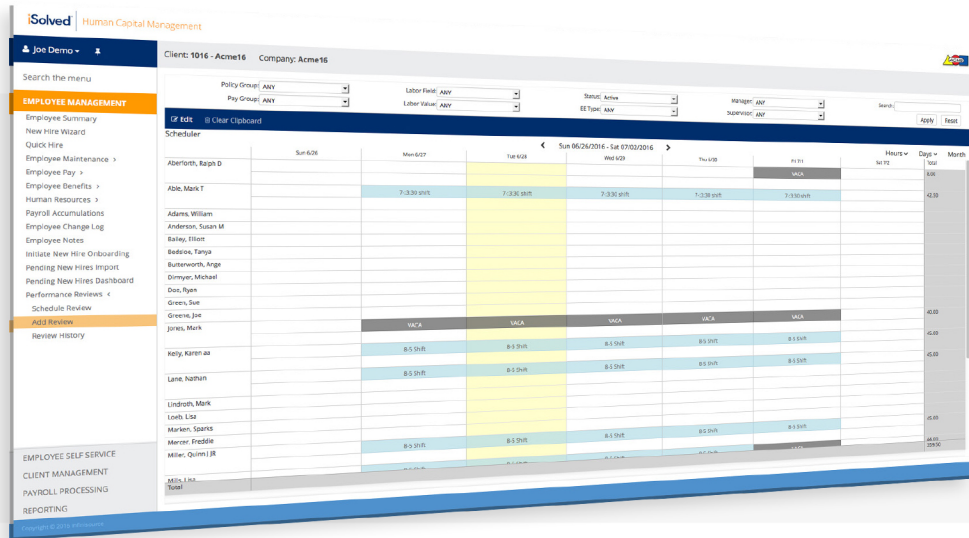

For many employers, tracking employee time and calculating the gross payroll is a big job and mistakes can be costly. Even accidental time errors can lead to fines, and intentional time theft costs employers thousands of dollars. With Time, Labor, and Attendance within isolved Workforce Management, calculation errors are eliminated and you can say goodbye to manual time sheets.

Workforce Management is built to be user-friendly for payroll administrators, managers and employees. Employees can use physical time clocks, the highly intuitive mobile app, virtual clocks, or a web browser to clock in at the start of their shifts. Supervisors can monitor their employees and run workforce analytics reports. Payroll processors eliminate the hassles of manual time sheets and time consuming calculations required to produce paychecks.

isolved also simplifies compliance with the Affordable Care Act (ACA). Employers can run configurable reports during designated periods of time to help determine eligibility for benefits. In addition, employers can better stay in compliance with all regulations by monitoring and viewing reports on overtime, hours worked, shift premiums, and more.

Save time. Minimize errors. Improve compliance.

Configure rules for tracking employee time based on your policies

Generate the information you need to make better decisions with detailed reports

Collect time from the method that best suits your environment, or a mix of methods – mobile, self-service, or physical clocks.

Allocate hours or shifts to different departments

Track employees from anywhere: working from home, multiple locations, or within a single office

Set up attendance rules with specific criteria and assign employees to appropriate shifts (requires the optional Scheduling module)

IP address restrictions are available to limit from where employees can clock in and out

Receive alerts for In Late, In Early, Under Hours, Over Hours, Out Early, Out Late, Unscheduled Absence, Out of Schedule, In Grace, Out Grace, and other options.

Build shifts and schedules for one or multiple employee(s) (requires the optional Advanced Scheduling module)

Improve employee time management while decreasing time spent on tracking

Improve the way your company handles time tracking and attendance with **Time, Labor, and Attendance.**

Transforming employee experience for a better today and a better tomorrow.
