(1) On-Board Backup is the ability of the timeclock to store punches in the event of a power failure. Timeclocks use non-volatile flash memory to store punch data.
(2) Battery Backup Accessory will allow the clock to function normally for a period of time in the event of a power outage.
(3) Either Bell Relay or Door/Buzzer Relay may be selected on the Velocity 800 and Velocity 850 models. The NXGG2, G2+, & G7 Models will support both a Bell Relay and a Door/Buzzer Relay together on the same clock.
(4) With On Demand
(5) Unlimited with On Demand.
