

ISOLVED PEOPLE CLOUD CONNECTOR FOR CLAUDE

HR, payroll and benefits – in the AI your employees already use

Employees ask Claude about their own HR data and get real answers from isolated without a portal login or a call to HR.

What employees can do

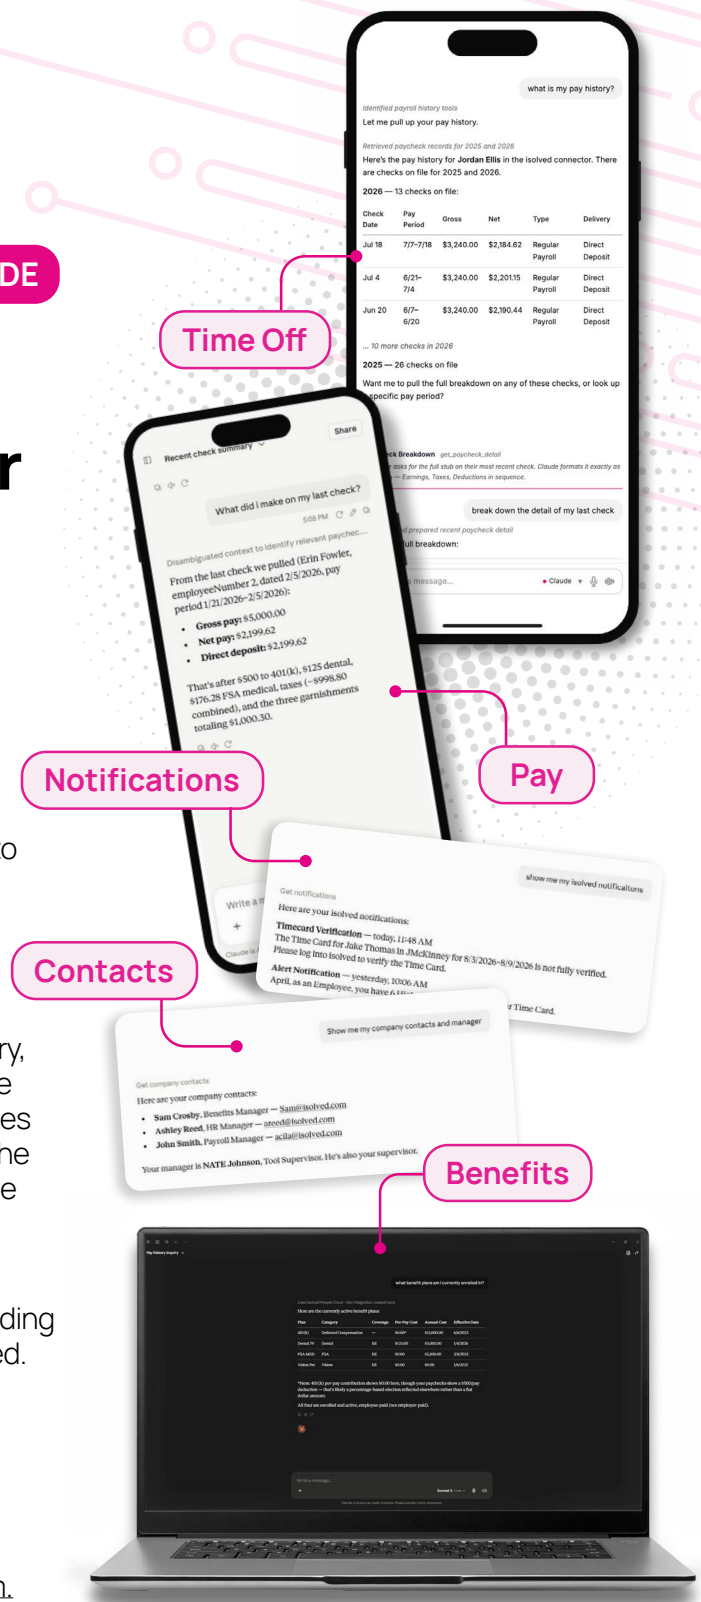

The isolated Connector for Claude puts everyday HR tasks into one conversation. Employees can check time off balances, submit requests, look up any paycheck on file, see what benefits they're enrolled in, view their isolated notifications and find company and personal contacts in plain language.

Every PTO balance check, paycheck question, benefits inquiry, notification and contact lookup the connector handles is one your team doesn't have to. That's time back for your employees and fewer routine questions reaching HR every pay period. The connector runs on the same isolated data you already manage with nothing new to administer. It extends what you already have into the place your employees already work.

Available on web, desktop and mobile. One connector, expanding over time as new employee self-service capabilities are added.

Where do employees go for support?

Employees with questions or issues with the connector should reach out to their HR administrators for prompt resolution. For questions about Claude itself or an Anthropic subscription, contact Claude support at support.claude.com.

Your employees' HR data – right where they already work. Contact us today to learn how the isolated Connector for Claude can work for your clients.
