Ability to identify employees who have a change of status in their measurement period

The screenshot shows a web application interface for generating reports. On the left is a navigation menu with categories like 'SHARE & PERFORM', 'EMPLOYEE MANAGEMENT', 'REPORTING', and 'SYSTEM MANAGEMENT'. The main area is titled 'Client Reports' and shows a list of report categories under 'Affordable Care Act Reports'. The selected report is 'ACA Safe Harbor Affordability-FPL'. To the right, there are filtering options for 'From Date', 'To Date', 'PayGroups' (with 'Master Test Company Inc.' selected), 'Include Exceptions Only', 'Union Employee Option', 'Employee Type Option', 'Organization Level' (with 'Division', 'Department', and 'Benefit Class' selected), and 'Work Location' (with 'Work Locations' selected). There is also an 'Options' section with a 'Format' dropdown set to 'PDF'. A 'Generate Report' button and a 'Go To My Reports Queue' link are visible at the top of the report configuration area.

Safe harbor methods are embedded in reporting for modeling

isolved lets you clearly and easily determine your ACA compliance with employee types, status and more. All with the push of a button.
